

SEALING YOUR LEAKS WITH POLYURETHANE

- | | |
|-------------|-------------|
| ✓ Sea Walls | ✓ Basements |
| ✓ Manholes | ✓ Bulkheads |
| ✓ Culverts | ✓ Pools |

We offer a variety of expanding polyurethane products to provide the right solution for your problem.

Hydrophilic Polyurethane:

Seeks water and reacts with the water. It can be injected into an active leaking crack and will completely seal off the leak.

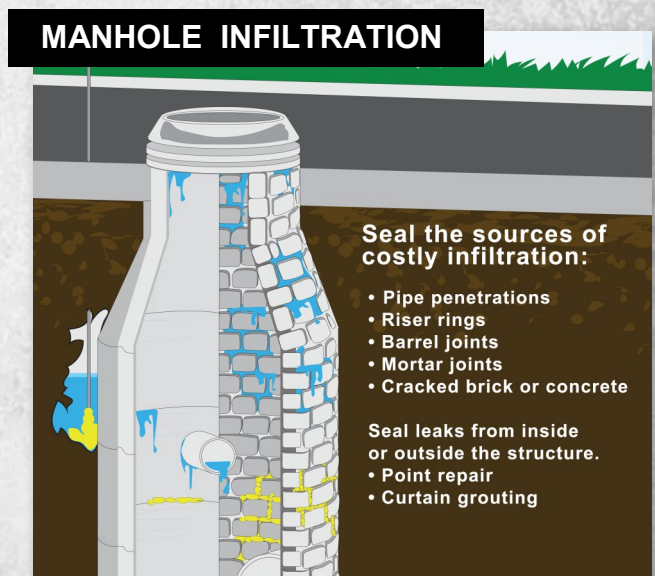

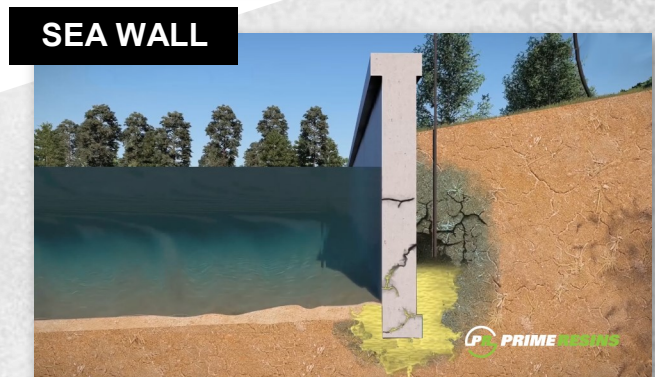

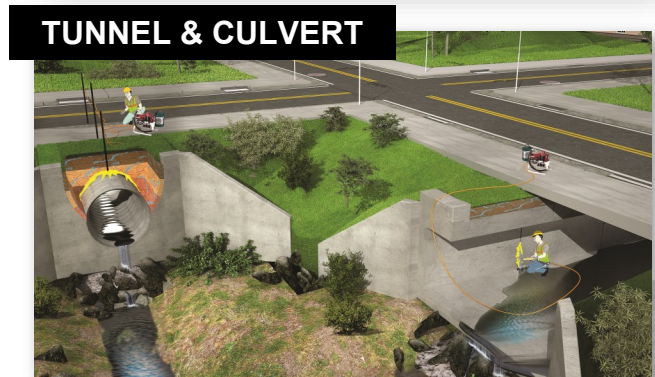

Hydrophobic Polyurethane:

Repels water and is used to displace water, fill voids and seal cracks.

- *Eco-Friendly*
- *Non-invasive*
- *Completely fills cracks, not a topical sealant*
- *Strengthens cracked concrete*
